LIQUIDITY & CAPITAL RESOURCES

The Company has no operating revenues and relies on equity financings to fund its exploration and administrative costs.

The Company’s operations consist of the exploration and evaluation of its various properties, a process that is ongoing, and is dependent on many factors some of which are beyond the Company’s control. The Company maintains a policy of reviewing its working capital requirements on a continuous basis and is mindful of its property and

administrative commitments. Each of Debut's projects has demonstrated sufficient evidence of geological merit to warrant retention and/or additional exploration.

At January 31, 2018, the Company's cash balance was \$14,480 compared with \$8,424 at April 30, 2017.

Additional funding will be required for the Company to continue operations. Management believes that it has the ability to raise sufficient funds for the continuation of operations and while management has been historically successful in raising the necessary capital, it cannot provide assurance that it will be able to obtain the required financing.
